

# Environmental Policy

As a company, we will ensure that we:-

- ❖ • Regularly review environmental issues and establish policies and programmes to deal with specific issues where necessary
  
- ❖ Consider the potential impact on the environment of new projects and developments
  
- ❖ Encourage consideration of environmental impacts internally and, as appropriate, externally with clients
  
- ❖ Use as little paper, and other throwaway material, as possible
  - Recycle and re-use where possible
